

CS3096 Computational Intelligence Laboratory

Assignment 4

6/10/2018

Implement any one of the following programs using PROLOG

Q1) The Logic based financial advisor explained in section 2.4 of the text book "Artificial Intelligence Structures and Strategies for state space search by George F Luger"

or

Q2) Knights Tour.

(Note: Explanations of both the problem statements and strategy to solve it and a good introduction to PROLOG for AI problem solving is available in the same book.)
